

10 DIY Tips for Starting a Teaching Repository

1. Find examples to model from other disciplines
 - Investigate other disciplinary resources (Are you duplicating?)
2. Identify like-minded collaborators
3. Consider what resources you need (financial, web resources, institutional support/housing)
4. Designate roles/ responsibilities for short term and long term sustainability
5. Consider how this aligns with your professional goals and/or job assignments?
6. Decide what your platform goal will be - journal, online, print, communication platform, etc. Will it be open-access?
7. Decide if this will be peer-reviewed? How rigorous will the peer-review process be?
8. Create a realistic timeline for implementation
9. Develop templates for authors
10. Decide if you need a managing editor and what duties that individual will take on.
